

Turn your company smartphones into OH&S Safety Devices

SOS

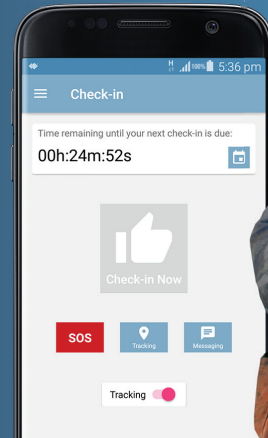

Check-in Management

2-way Messages

Tracking

The Tracertrak SafeWorker™ App enables your company smartphones to operate as fully featured remote worker safety tools. The App provides SOS alert with location, one touch worker check-in with in-app reminders, 2-way logged messaging between remote workers and the office and tracking so during a workplace safety incident you know where to search.

The Tracertrak SafeWorker™ App, used as part of the Tracertrak system, provides a powerful safety monitoring and exception management system that helps organisations achieve the highest standard in remote worker safety compliance.

Use your company smartphones without the need to purchase additional hardware.

Tracertrak Administrators can build their own business rules for when and how remote workers are tracked, define check in schedules for routine reporting that "all is okay" to match job risk profiles and define escalation rules for when check-ins are missed.

The App shows the check-in schedule for the day and notifies the lone worker when their check-in is due or overdue. When serious trouble strikes workers can initiate an SOS Emergency Alert with GPS location information monitored 24x7 by Tracertrak.

Rest assured with integrated GEOS support services, offered as standard with all Tracertrak SafeWorker™ App accounts. GEOS provides global emergency response coordination, providing peace of mind wherever you may be in the world.

- SOS function with slider and countdown timer to prevent false alarms
- Check-in function with in-app reminders for the lone worker and automated missed check-in alerts for the safety officer
- Send and receive messages between the lone worker and office console user or company contacts
- Optional GPS sourced tracking ensures device locations are of the best accuracy available
- In-app notification of incoming messages
- Supports head office polling of worker location to assist during a safety incident

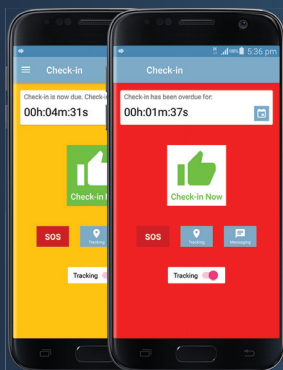

- Configurable tracking intervals defined for at-work hours to ensure recent location information is available for a missed check-in response and privacy management so that tracking can be disabled outside of work hours
- Optional mandatory tracking ensures device locations are always available
- Pivotal Numbers capable - give each user their own unique '04' mobile number, simplifying messaging for Tracertrak users with a two-way device. Each Pivotal Number follows the worker as they switch between devices, achieving a seamless messaging experience for your organisation and worker.

Smartphone sold separately. Requires iOS 10.0 or later. Compatible with iPhone, iPad, and iPod touch. Apple and iPhone are a trademark of Apple Inc., registered in the US and other countries. Requires Android 5.1 or later. Google Play and the Google Play logo are trademarks of Google Inc. Android is a trademark of Google Inc.
